## SUMMARY

I am a highly motivated and talented front-end developer having a skillset of both width and breadth seeking to work with a team of other brilliant developers doing meaningful work to the highest standards.

## EDUCATION

**Bachelor of Science in Computer Science and Elective Studies | St. Cloud State**  
2007

Teacher's Assistant – Assisting in the CS lab, tutoring, grading code/projects

President of the Computer Science Club – Conducted regular meetings, organized outings, and mentored / onboarded new CS students.

## EXPERIENCE

**Web Developer | WebStack IT**

MAY 2016 – PRESENT

Develop various web-based solutions using HTML5/CSS3, JavaScript. Create custom jQuery plugins. Built SPA applications using Angular 5, Angular 4, Angular 2, Angular 1.5, Angular 1.3, Knockout JS. Create responsive UI both organically and using existing frameworks such as Bootstrap.

**Software Engineer | Amano McGann**

OCTOBER 2014 – MARCH 2016

Generated responsive, mobile first UI with Twitter Bootstrap in and Agile environment. Created new dashboard widgets for cloud application using AngularJS, jQuery, Knockout, native JavaScript. Created cloud databases, cloud websites, and cloud services in Microsoft Azure. Built custom jQuery plugins for customer-facing web application. Designed and implemented the presentation layer of our C#/MVC applications.

**Web Application Developer | Polaris**

APRIL 2013 – AUGUST 2014

Implemented drawer navigation system for IndianMotorcycles.com, VictoryMotorcycles.com, Slingshot.polaris.com, and their off-road vehicle sites. Created CDN-driven high-resolution product viewer and custom jQuery plugin for use by other developers on large e-commerce websites. Took a lead role in most front-end projects while working closely with quality assurance. Participated in daily stand-ups, sprint planning, sizing, grooming and retrospectives.

## Web Developer | 121 Marketing Solutions

SEPTEMBER 2009 – APRIL 2013

Implement responsive, mobile friendly client-side design using HTML5, HTML Boilerplate, Twitter Bootstrap, Modernizr, media queries, and custom frameworks and libraries. Built custom, dynamic web applications and websites utilizing PHP, MySQL, JavaScript/jQuery, CSS/SASS/Compass, and Zend Framework. Created custom interactive multimedia for large applications, clients include United Airlines, Choice Hotels, Hilton, and more... Customized large e-commerce solutions.

## Web Developer / Business Analyst | Cisco

AUGUST 2007 – OCTOBER 2009

Created several user-facing UI components via HTML, JavaScript, CSS, and Flash / ActionScript. Built rapid prototypes and proof concepts to accompany the requirements I gathered by integrating with stakeholders, offshore resources, internal decision makers, and business product owners. Ensured quality and accuracy for both onshore and offshore development teams.

### SKILLS

- HTML 4/5
- CSS 2/3
- SASS/SCSS
- Responsive Design
- JavaScript, plain, ES5+
- Angular 1.x, 2+
- Typescript
- JSON
- C# .NET
- Azure
- Web API
- Source Control
- Visual Studio
- Adobe
- Agile
- Jira
- Legacy and modern DOM
- Custom and Bootstrap 3, 4+
- Structured + variables, preprocessed
- Home-rolled or library-based
- jQuery, Knockout, AJAX
- SPA – single page applications
- Compiled (transpiled) to ES5
- Client-side model binding (MV\*)
- MVC, Razor, Code-first database
- Cloud SQL, CDN,
- Endpoints for asynchronous use
- TFS, Git, Bitbucket, SVN
- Solutions, projects, sprint items, TFS
- Photoshop and Illustrator, full suite
- Stand-ups and all other ceremonies
- Agile project management

### ACTIVITIES

I enjoy mentoring other developers by sharing experiences, I fly small 2 and 4 seat airplanes, I take my son to football and my girls to dance. In the evenings I can be found in my home office downloading a new framework or working on some “what-if” ideas I have. My evenings are often my R&D time, usually work-related but not always. If I’m learning something new, I’m happy.
